To: Richard Pearson <[XXXXXX]>

John wrote his article before the short piece came out. It was published after but written before. The company just took a long time to approve it. Wouldn't have been fair to make him go back and add something else.

He's been working for me 4 months or so. He's pretty good, gets things written pretty quick.

GALE is just slow my friend. I chatted with Michael last night and they're still pending. I can't make them approve when I say, it's up to them unfortunately.

good point.

on GALE, I thought that John Mylant did a great piece this week, but he did not address the short attack.

did the company approve his piece ? why didn't they add anything about the short attack ? it seemed weird to ignore it. but it was a good piece. how long has he been working for you ? he is pretty good. I am going to study some of his stuff. do you have any favorites of his that were very good ?

also, do you know why GALE is taking so long to approve my piece ? I wanted to get that one out quickly while it was still fresh.
