Stuck in a car! Sounds like a road trip. Those are fun.

Ok well right now I have two companies I want to write on... ICLD, and ANVX. Intercloud and Anavex. A tech company and a biotech respectively.

Take a look when you have a chance and let me know what you think about being able to develop convincing arguments around buying the stock for Seeking Alpha. We're not into pumping and dumping so really not trying to sugarcoat negative info, but trying to highlight positives.

We've commissioned a few articles on ICLD already that you will find on Seeking Alpha and Wall Street Cheat Sheet. This will give you an idea of the type of article we like.

Anavex is a new client, very small so may need to do a more general piece on Alzheimer's and then mention ANVX along with other tickers to get it accepted.

I can set up a call with CEO if we need to. If you want to write it, after you write, we would first send a draft to CEO for review and then have you publish. We pay \$500 to you upon publication. That's per article.

If it sounds like something you are interested in doing, let's try to chat next week for just a few minutes. I like to talk to the person I'm doing business with every once in a while :)
